PANORAMIC

AUTOMATIC SLIDING DOOR

Ultra-slim frames for wide, open views

SLIM EDGE SOLUTION

Panoramic Automatic Sliding Door

For entrances where the view matters, our Panoramic Automatic Sliding Door uses exceptionally slim aluminium frames, so the glass takes centre stage and the opening feels light, wide and uninterrupted. The automatic mechanism is fully concealed within a neat header cover, keeping the whole entrance clean and contemporary. Over the past decades, we have been among the first in the industry to invest in our own Slim Edge profile moulds. Because the profiles are manufactured locally, we can keep the cost within reach of every project while assuring Malaysian-made quality.

Key features

01 Ultra-slim frames

Slender aluminium frames keep the focus on the glass and the view.

02 Concealed mechanism

The automatic operator sits neatly inside the header cover.

03 Wide, open entrances

Fixed and sliding panels combine to create a broad, uninterrupted opening.

04 Locally manufactured

Made from our own Slim Edge moulds in Malaysia, at a cost within reach.

Frame finish: black or mill finish aluminium

Suitable for: offices, showrooms, retail and residential entrances
